

The logo for MATCON, featuring the word "MATCON" in a bold, white, sans-serif font with a registered trademark symbol. The letters "M" and "A" are connected, and the "T" is stylized with a vertical line through it. The background of the entire page is a blue-tinted photograph of several large, industrial Intermediate Bulk Containers (IBCs) arranged in a row. Each container has a conical bottom and a top with a handle and a spout. The containers are mounted on metal pallets.

The Original Cone Valve IBC Manufacturers

Matcon supply a range of IBCs for the processing, storage and transport of bulk material solids, powders, granules and tablets.

Our unique Cone Valve technology within each IBC prevents the traditional powder handling issues of bridging, blocking and blend segregation.

MATCON CONE VALVE IBC TECHNOLOGY

THE CONE VALVE IBC ADVANTAGE

- Guaranteed powder flow
- Control of flow
- Prevent segregation
- Automated discharging procedure
- Complete discharge
- Dust-free handling
- Easy-clean, hygienic design
- Direct dosing, no secondary feeders

Designed to meet the highest hygiene and safety requirements, each IBC is manufactured with no enclosed crevices or hollow sections that could trap product or contaminants.

Efficient and dust-tight, they provide a system that lives up to the most rigorous of standards.

The Matcon IBC is manufactured from 316L stainless steel or 304 stainless steel, dependent upon the application.

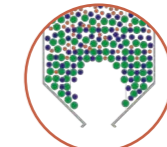

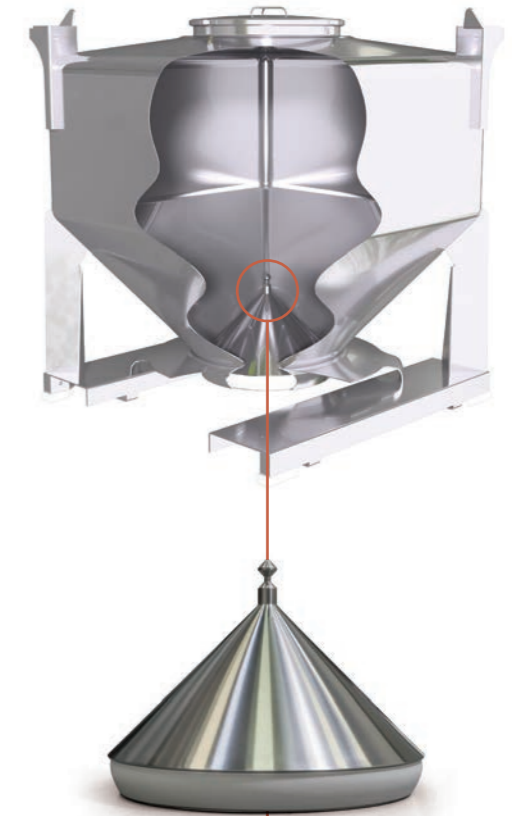

300 - 500 Litres - Small IBC for smaller batch sizes or testing purposes.

1,000 - 2,000 Litres - Most commonly used range of IBC batch sizes.

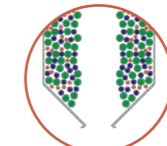

2,500 - 3,500 Litres - Large scale IBC to match larger batch requirements.

Key Benefits

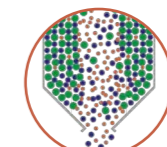

- Sizes range from 300L to 3500L+ capacity
- Prevents segregation with mass flow discharge
- Fully contained, dust-free handling
- Complete, controlled discharge
- Hygienic, easy to clean design
- Easy handling with Forklifts, AGVs & Straddle Trucks
- Direct dosing from the IBC without ancillary device
