Trial Equipment

Because performance should be proven, not promised.

Here is a selection of our equipment located in the UK which is available to trial

YTRON Z-Lab

In-line Homogeniser

The Z-lab from YTRON is a powerhouse in many industries including food and dairy. A rotor/stator homogeniser that covers multiple applications.

The Z-Lab can be scaled up to production size equipment.

Z-Lab

Scalable Lab System

Perfect For R&D Milling

The perfect platform for trialling multiple process technologies on a single drive unit.

U5 Comil

L1A Fitzmill

H5 High Efficiency

S5 Flexsift

SLS

Comil 194

Production Scale Milling

The Overdriven Comil is a Quadro Engineering original invention. Excelling at uniform size reduction and deagglomeration of a range of products whether they're wet, dry, heat sensitive or sticky.

Comil

Our full range of equipment located in the UK are below:

- 194 Comil - Milling
- SLS - Lab Scale R&D
- VMI Turbotest UP - Lab Mixer
- S20 Flexsift - Security Screening
- Z-Lab - Homogeniser
- YTRON Y - Jet Mixer
- ZC - Powder Incorporator
- ZHV - High Velocity Emulsifier
